

# DANGER - Compressed air!

Compressed air can be fatal. Misuse of compressed air can have tragic consequences – if used on exposed skin it can cause serious injury or even death.

- **SAFE** - high volume, low pressure no risk of skin penetration
- **EASY-TO-USE** - simple on/off operation
- **EFFECTIVE** - removes dust, paper fibres, grit, etc.
- **OSHA Compliant**
- **COST EFFICIENT** - blower powered lower operating costs than compressed air\*
- **REDUCED NOISE LEVELS** - 78Db (A)

\* Compressed air should never be used for personnel de-dusting for safety reasons - but it happens!

ACI's blower powered 'JetBlack' is the ideal solution for de-dusting personnel. It enables personnel to avoid accumulation of dust on their clothes and helps prevent dust from being transferred between departments, including canteens. Minimises transfer of dust from work environment to vehicles and homes.

Being blower powered and delivering air in high volume at low pressure, the JetBlack is entirely safe to use even when directed at areas of exposed skin. Also, the air is clean thanks to the JetBlack's replaceable filter.

Low noise levels - 78dB(A) - promote a better working environment. Available as easy to install wall-mounted or transportable units

**Air Control Industries** Shaping the future of air movement

## Wall Mounted Cleaning Stations

- Ideal for entry/exit point of factory floors, canteens, changing rooms.
- Touch button for on/off operation.
- 115V and 230V, 50/60Hz units.
- Fitted with 1.42m, 56" long hose as standard.
- Extras include motor filters for extremely dusty environments.
- Robust, rugged design. Main body constructed from high grade plastic.

## Portable Jetblack Units

- Speed controllable airflow.
- Extra long hose supplied as standard (2.44m/96" long).
- 115V and 230V, 50/60Hz units.
- Optional extras include footswitches and air lances.
- Carrying handle supplied (weighs less than 7Kg/16lbs).
- Anti Static version available. Designed to remove static charges and dust particles from product surfaces. Ionisation is provided by titanium emitters located in the nozzle of the main gun housing. The unit is powered by a high voltage DC source.

## Personnel Cleaning Booth

- Uses two airstreams to effectively clean personnel and remove airborne contaminants.
- Stand alone unit contains and controls blower driven air to remove and draw dust particles away from personnel.
- Booth constructed from plywood with white composite finish, extruded aluminium framework and a mild steel plenum base.
- The cleaning booth can be ducted directly onto an existing extraction system.
